FUN & SIMPLE

I like to keep things simple,
interesting & fun because making
things complex just makes the
problem even harder to solve.

EDUCATION

Uttaranchal University | Dehradun (U.K.)

BTech in CSE with specialization in Cyber Security

Coursera | [coursera.com](https://www.coursera.com)

Google Cybersecurity Professional Certificate - *Online certificate*

IIT Indore | nptel.ac.in

System and Usable Security - *Online certificate*

EXPERIENCE

June 2023-present

Security Consultant & Software Developer | Pooja ITR Center

As a part-time Security Consultant, I actively participated in information security and protecting hundreds of clients from cyber attacks. Also worked to deliver custom software for the organization.

December 2022-2025

Administrator | growinghacker.com

Started as a project, I solemnly created growinghacker.com for providing cyber security related content to its audience with simplicity and making learning more fun and engaging.

SKILLS

SIEM & Log Analysis, Digital Forensics, Malware Analysis, Incident Response, Network Security, Penetration Testing, Python & Automation, Web Application Security, Identity & Access Management

PROJECTS

My Cybersecurity Home lab (Infrastructure)

Jun 2025-Present

I maintain a personal home laboratory to conduct experiments with various technologies. Through this environment, I acquire knowledge in areas such as XDR, SIEM, EDR, VAPT, Active Directory, Server security, and much more.

BNSAI (Mobile App)

Jun 2025-Present

A mobile application designed to provide information and insights on the 'Bharatiya Nyaya Sanhita,' integrated with AI capabilities.

Hacking Toolkit (Software)

Sep 2024-Feb 2025

A comprehensive cybersecurity toolkit for professionals and enthusiasts, providing essential tools for hashing, encryption, and cryptographic operations. [view](#)

CGC - Capital Gain Calculator (Software)

June 2025-July 2025

A visualizer that automates the calculation of stock market capital gains using AIS Trade Data, simplifying tax computation. [view](#)

CryptoAIS - Crypto Trade Calculator (Software)

June 2025-July 2025

A lightweight and powerful tool designed to automate capital gain calculations on cryptocurrency trades. [view](#)

Sola - Form-16 Automation (Software)

June 2025-June 2025

A software tool designed to automate the filing of Form-16 using the ITR Format, simplifying the creation process. [view](#)

Copy-Paste-ITR (Extension)

June 2024-June 2024

A browser extension that enables copy, paste, and text selection functionality on the often-restricted Income Tax Return (ITR) e-filing portal. [view](#)

Hotel Review Sentiment Analysis (Webapp)

Sep 2024-Dec 2024

A comprehensive cybersecurity toolkit for professionals and enthusiasts, providing essential tools for hashing, encryption, and cryptographic operations. [view](#)

GitSync (CLI Tool)

July 2024-July 2024

A comprehensive cybersecurity toolkit for professionals and enthusiasts, providing essential tools for hashing, encryption, and cryptographic operations. [view](#)
